# **MyAirProducts<sup>SM</sup>** **Container Tracking App** Conserve. Count. Control.

# Why Choose the [MyAirProducts](#) Container Tracking App?

## Conserve

### Save time and money

- **Save on container rental costs and lost cylinder charges:** Know what you hold, how many and for how long
- **Reduce Costs:** Reduce your total assets by only ordering those you need

## Count

### Increase productivity

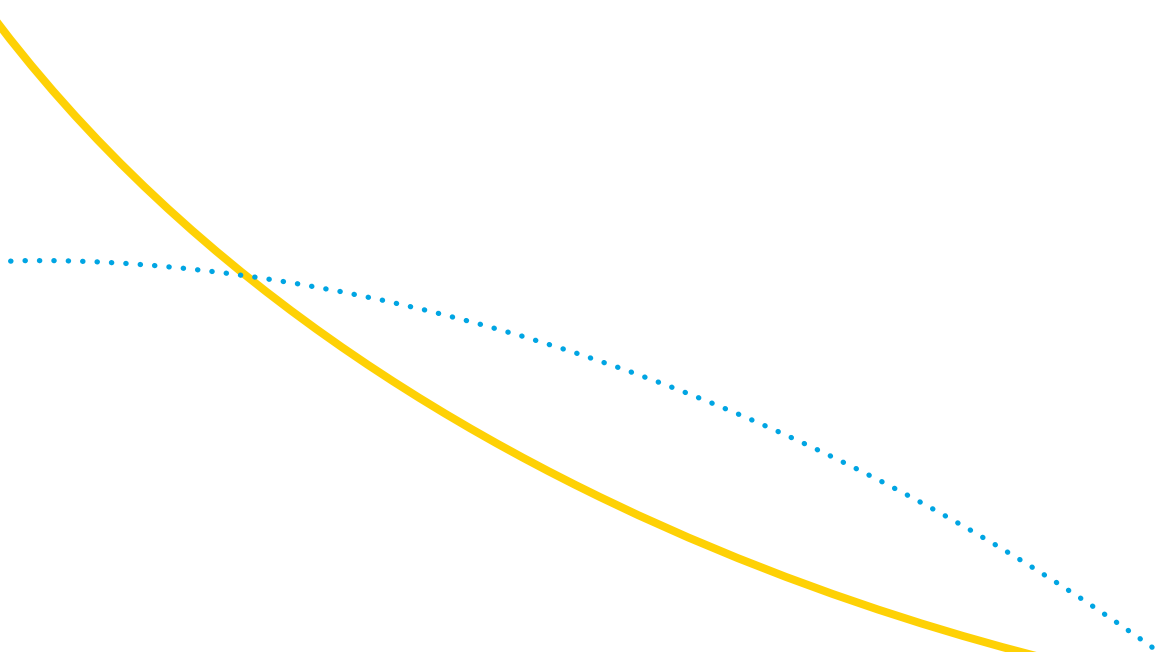

- **Decrease downtime:** Utilize your stock in the event of unplanned downtime
- **Inventory visibility:** Avoid run outs by understanding usage by departments

## Control

### Gain peace of mind

- **Inventory management:** Full traceability of your assets
- **Be Safe:** See how many hazardous materials are on site
- **Live asset traceability:** Monitor container usage in real time

# With MyAirProducts Container Tracking App you can:

Scan containers and change Points of Use or status

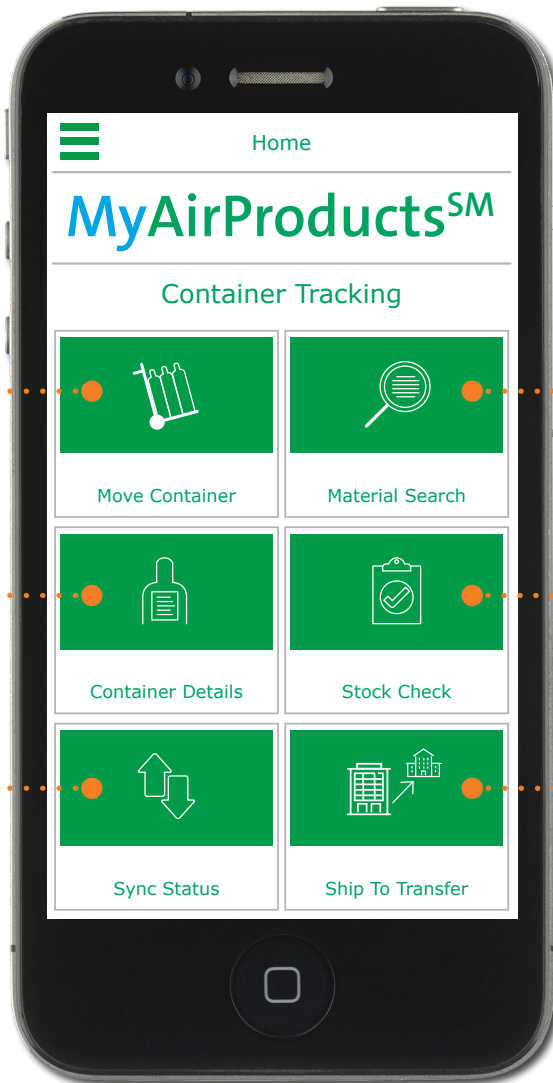

Locate containers easily  
Search by material code, batch code or CTN

Find specific container details like Batch Number, Shelf Life and Movement History

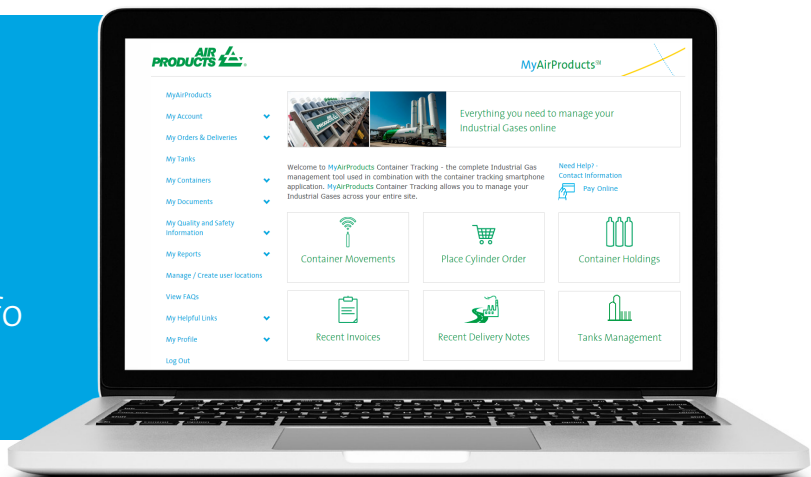

Control your stock by points of use, material or status

Work offline and sync to account when online connection is available

Transfer containers between different Ship-to locations

Access detailed inventory reports  
Create and manage points of use  
Get quality and safety info on specific containers

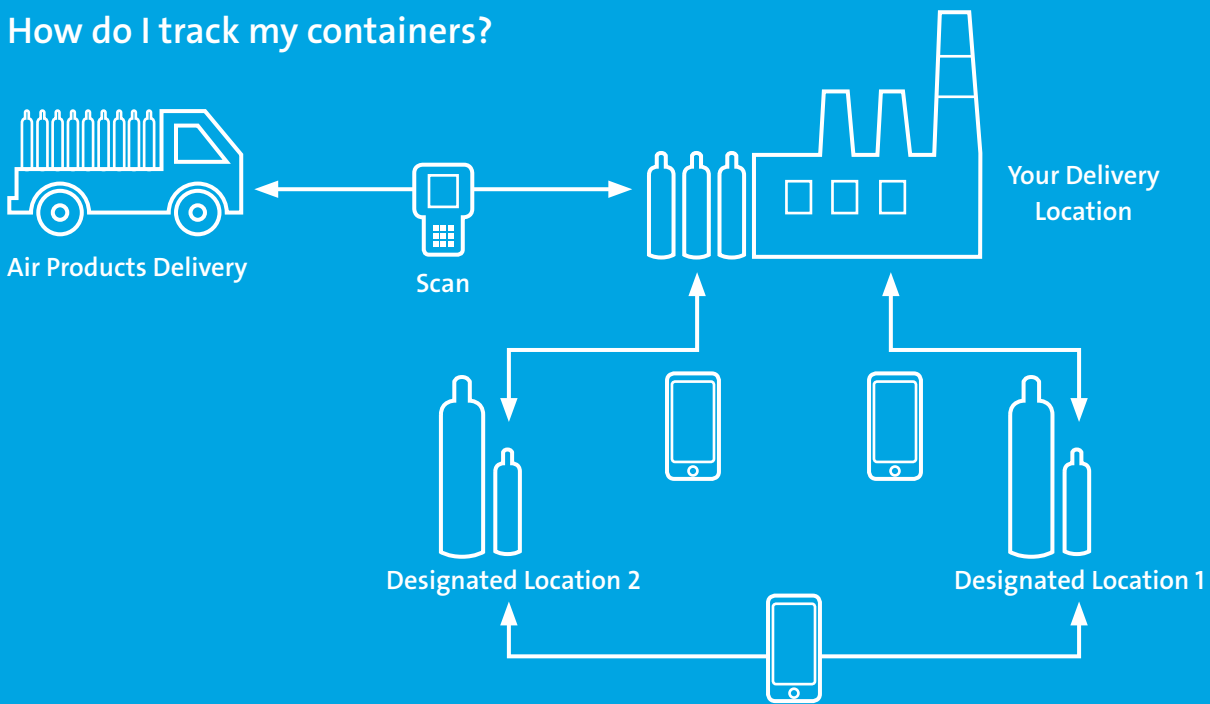

# Inventory insights at your fingertips.

## How does the MyAirProducts Container Tracking App Work?

- We have labelled all our cylinders with a **unique barcode and container tracking number (CTN)**
- By scanning this label, we are able to see key information about the cylinder e.g. **retest/expiry date**
- This service will provide **full supply chain tracking** of ALL individual cylinders up to and including the point of delivery and return
- Additionally customers can continue the tracking trail and **scan the cylinders between Points of Use** within their site

### How do I track my containers?
